- Patented, ratcheting mechanism utilizes Snap-on Dual 80® technology; combining dual pawls with a thin-walled, box-end design, for smooth operation and more torque transfer in less lateral space
- Flank-Drive® gear features an 80-tooth profile and is cold-formed from the same steel as Snap-on sockets, delivering up to 40% more cycle life and strength equivalent to traditional combination wrenches
- Flank-Drive®Plus wrenching profile on open end, "bites" into the fastener, preventing slipping and rounding of the fasteners, while providing up to 62% more turning power and strength
- Manufactured from special alloy steel; precision forged and heat treated, with nickel-chrome finish for optimum strength and durability
- Longer length wrench handle is sized for optimum comfort and balance, and provides increased leverage, especially in tight spaces
- Handle is offset 15° from box-end for maximum knuckle clearance and increased access in any space
- Includes SOXRRM10–SOXRRM19 (10–19 mm)
